Project Experience

- **Project 1: Sustainion**

  Description: Sustainion is a platform designed to help you meet the full spectrum of ESG requirements, empowering you to monitor and make sense of key data so you can optimise your all-round business performance and play your part in building a better future for people and the planet.

Roles and Responsibilities:

- Conducted comprehensive manual testing.
- Automated testing processes using Postman
- Collaborated with cross-functional teams to identify and troubleshoot software defects.
- Conducted regression testing to ensure the stability of new features and updates.
- Contributed to the improvement of testing processes, enhancing overall product quality.

- **Project 2: Pathway**

Description: Pathway Core allows real-time visibility over all of your consignments in one place, making tracking deliveries easier than ever. Whether your shipment is scheduled to arrive on time or is delayed due to weather, one click is all it takes to get live information.

Roles and Responsibilities:

- Collaborated closely with the development team to address and resolve issues identified during testing, fostering a collaborative environment.
- Conducted regular client calls to provide updates on project progress, address any concerns, and gather feedback.
- Utilized Agile methodologies to ensure the project was delivered on time and within budget.
